## Mars

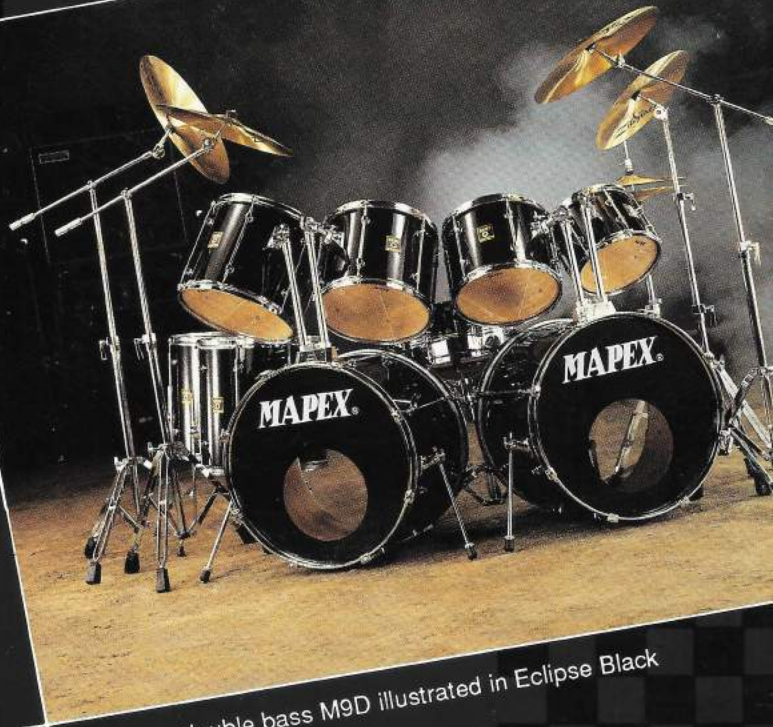

### Series

Nine-ply cross laminated wood shells are standard in the Mars Series. Selected hardwood shells with choice wood grain interiors provide rich sound with great projection and volume.

Each shell interior is carefully sealed for years of playing satisfaction. Notice the sleek design of the Mars full length lugs. These lugs are mounted off the face of each drum shell to allow the shell greater freedom to vibrate and project. This type of design enhances the total sound quality and increases volume with any playing style.

Heavy duty double braced hardware is provided with each kit and features the unique MAPEX "Pro-Lok" system of adjustment. The chain drive hi-hat stand and bass drum pedal offer smooth, fast response.

The Mars Series . . . extraordinary!

## Mars Series Hardware

**C300 Cymbal Stand**  
Perfectly balanced sturdy double-braced legs. Only "Pro-Lok" height adjustments secure your cymbal investment.

**B300 Cymbal Boom Stand**  
The weighted boom arm protects your cymbal against disastrous falls. The side mount boom arm allows the tightest of angles to be achieved for positioning in any fashion.

**H300 Hi-Hat Stand**  
The H300 features smooth chain drive action with adjustable spring tension.

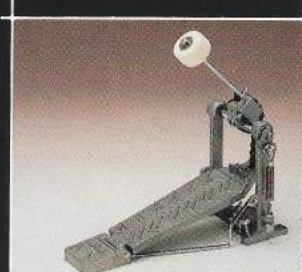

**TS300 Double Tom Stand**  
The double braced legs and unique "Pro-Lok" height adjusters provide exceptional support for extra toms.

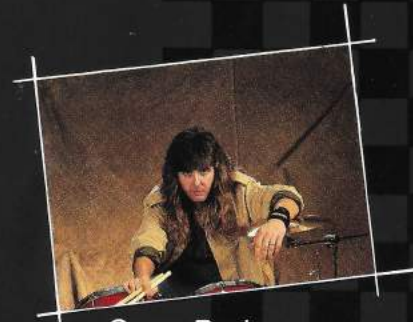

**S300 Snare Drum Stand**  
Mapex S300 snare stand features geared, tilt system angle adjustment for superior strength and flexibility.

**T300 Drummer's Throne**  
The T300 features a thick padded seat, professional height adjuster with a memory lock, and thick double-braced tripod legs for durability and strength.

**P300 Pedal**  
Designed for speed and strength, the Mars P300 pedal uses professional chain drive.

# MAPEX® Saturn Stage Series

The Saturn Stage Series is designed for the professional who demands expressive sound quality, plenty of volume, plus a wide choice of colors.

Imagine yourself behind a set in Eclipse Black, Smokey Chrome, Wine Red, Yellow Flash, or Snow White metallic wrapped finishes. The Maple shell interiors of each Saturn Stage drum receive two coats of lacquer and are hand sanded twice for great sound and projection. With Saturn Series, you hear only the sound of choice maple not sealant or paint.

Seven piece S7 illustrated in Snow White

Saturn Stage shells are MAPEX's exclusive seven ply design that fuse the clean, crisp sound of choice maple and the power and durability of select hardwood. Each ply is cross laminated and then seamed at 15 degree angles for the utmost in power and strength. Superb bearing edges ensure plenty of volume with exquisite sound quality.

Five piece S5 illustrated in Yellow Flash

The high tension lugs offer accurate tuning while still minimizing contact with the wood shell. The Saturn series high tension lugs only touch the shell in two contact points instead of being mounted directly on the shell thus greatly enhancing tonal resonance, volume and projection.

## Saturn Series Hardware

### C500 Cymbal Stand

Excellent stability. Cymbals are secure with the unique "Pro-Lok" height adjustments.

### B500 Boom Stand

This heavy duty boom contender can convert into a versatile extra tall straight stand or disappear for compact transportation.

### H500 HI-Hat Stand

A totally professional dual spring hi-hat. Even allows you to adjust the angle of the foot plate.

### TS500 Double Tom Stand

Quick positioning and extra stability.

### S500 Snare Drum Stand

The nylon ball socket allows infinite settings and can easily be adjusted by loosening the "Pro-Lok" lever.

### T500 Drummer's Throne

No slip threaded height adjustment. Extra thick padded seat.

### P800 Pedal

The MAPEX P800 twin bass pedal's dual universal joints offer smooth action and quick response.

### P500 Pedal

Ball bearings and chain drive will offer years of responsive action.

## Saturn Studio Series

The dynamic Saturn Studio Series delivers the powerful presence you demand. These outstanding high gloss lacquer finished outfits offer exceptional sound quality, unique features, and solid construction.

Saturn shells are MAPEX's exclusive seven ply design that fuse the clean, crisp sound of maple inside and out with the power and durability of select hardwood. Each ply is cross laminated and then seamed at 15 degree angles for the utmost in power and strength. Superb bearing edges ensure plenty of volume with exquisite sound quality.

The high tension lugs offer accurate tuning while still minimizing contact with the wood shell. The Saturn series tension lugs only touch the shells in two contact points instead of being mounted directly on the shell thus greatly enhancing tonal resonance, volume and projection.

Seven piece double bass SL7D illustrated in Polished Black

All lugs, mounts, and hardware attachments are separated from the shell by a poly barrier greatly enhancing optimum shell resonance.

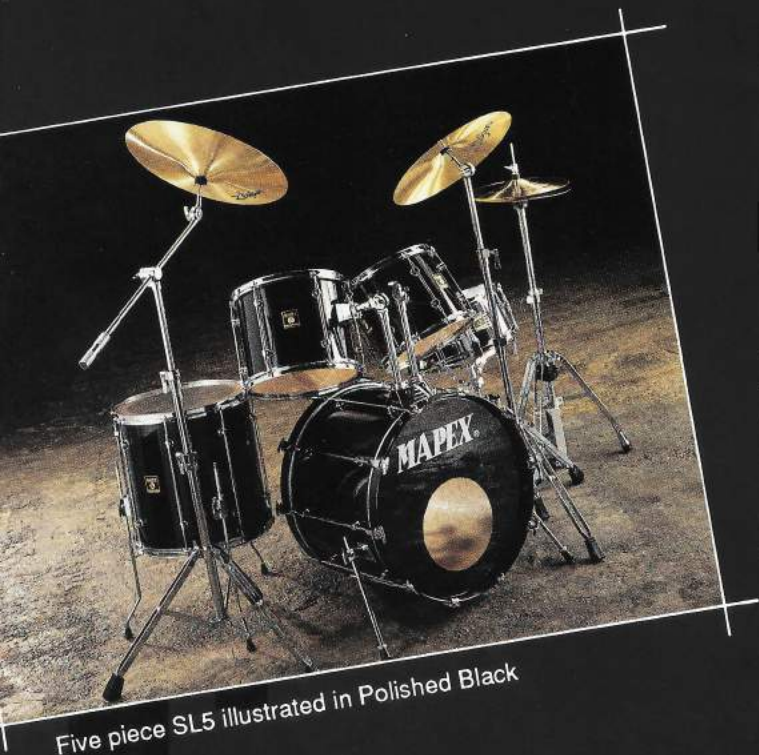

Saturn Studio series feature the MAPEX 11 step lacquer finish process. Every Saturn Studio drum receives six applications of lacquer, four hand sandings, and a final buffing to bring out a beautiful long lasting luster. The interior of every shell has two coats of lacquer and two hand sandings for the warm sound of maple not sealant. During the finishing process each lacquered shell dries naturally for over sixty-two hours.

# MAPEX<sup>®</sup> Orion Studio Series

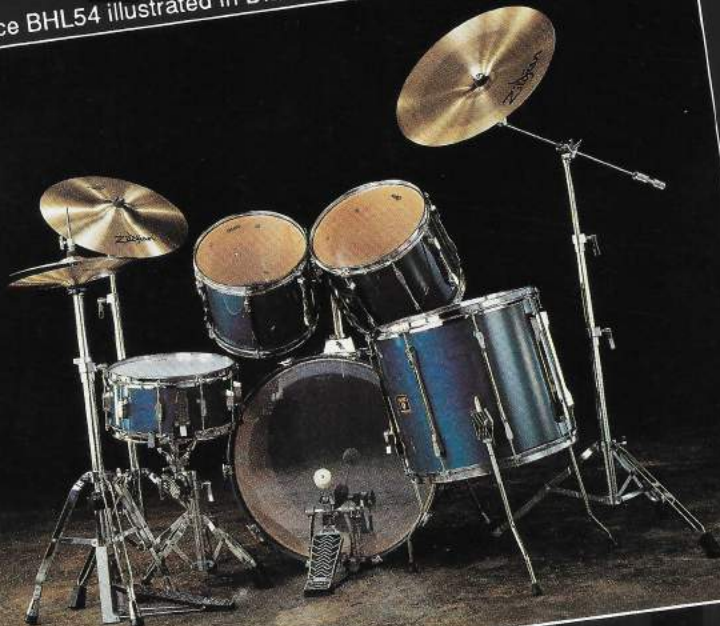

MAPEX Percussion Technology proudly offers its greatest achievement in drum design with the soon to be famous ORION Series.

Numerous integral parts of each Orion Series are totally unique to MAPEX and protected under Patents Pending worldwide. Take a careful look at the fresh design of the patented "Freedom" high tension lugs. Mounted off the surface of each wood shell, these lugs offer full length lugs that actually optimize maximum shell resonance. Check out the external tom mount system on the Orion Studio series toms. Orion Series kits even come equipped with matching birch wood snare drums.

MAPEX Orion Series . . . simply incredible!

All Orion Studio shells including the matching snare are made of the finest North American Birch. Each shell is 8mm thick and is cross-laminated in six plies. Each ply is diagonally cut at precisely 15 degrees to ensure superior strength. North American Birch is renowned for its brilliant resonance and hard, fast attack. Shell interiors are meticulously hand-sanded and twice lacquer sealed for the epitome of fine quality birch drums. To enable optimum shell resonance, all shell to head bearing edges are exactly machined to the most desired angle of 45 degrees.

Five piece BHL54 illustrated in Diamond Blue

Seven piece BHL7 illustrated in Transparent Red

In creating the Orion series, we at MAPEX first thoroughly researched existing full length, high tension lugs. While better tuning availability was always cited, many were concerned over the loss of sound with this type of heavy metal lug mounted directly to the drum shells deadening the sound. Thus was born the idea of the MAPEX "Freedom" lug. "Freedom" lugs are full length, high tension lugs that are mounted 4mm away from the shells to provide maximum resonance. Only two contact points attach "Freedom" lugs to the shell and these are insulated by a poly barrier washer. The result is mounted toms that ring louder and longer with no harsh overtones. Look inside an Orion tom and count the fewest number of screws on any drum made today. Compare this with other brands of drums and you'll see one big reason why Orion series drums sound so good.

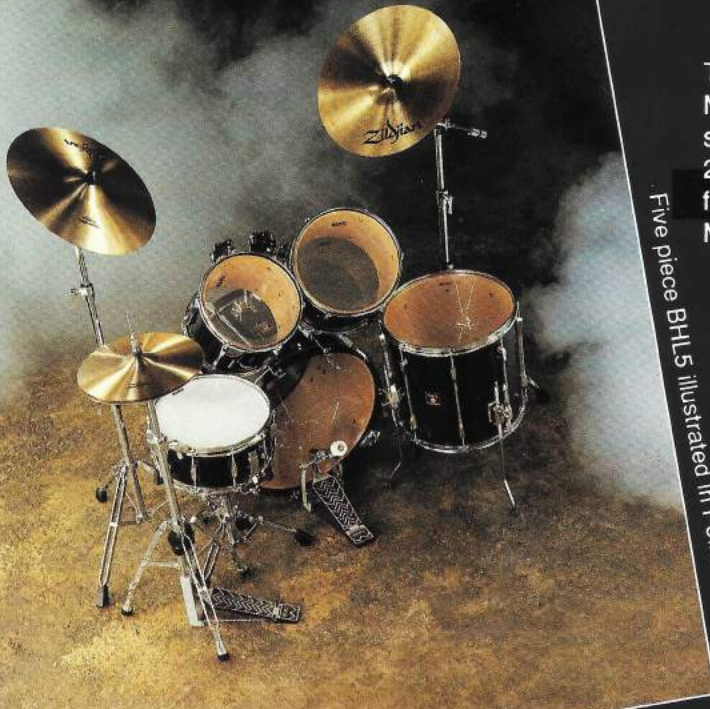

**HIGH GLOSS LACQUER  
FINISHES;  
DIAMOND BLUE**

**POLISHED BLACK**

**TRANSPARENT RED**

**NATURAL**

Five piece BHL5 illustrated in Polished Black

To match the brilliance and attack of your Orion Studio birch toms, MAPEX includes a matching all birch snare with every Orion Studio series kit. The 6 ply North American birch shell comes equipped with 2.3mm Powerhoops for strength and incredible rim shoots. Lacquer finished to match your Orion Studio kit, every Orion snare is finished in Mapex's unique eleven step lacquer process to a glassy smoothness.

Only external tom mounts are utilized on the Orion Studio tom toms. These mounts are one important part of the sound quality produced by the Orion series. With all mounting brackets outside the tom's wood shell, shell resonance and volume are maximized. A poly barrier separates the mounting bracket from the shell to further enhance tonal quality. Solid die-cast parts mean years of satisfaction.

DAVID ALLEN  
Marshall Tucker Band

Fast and easy with unlimited flexibility. That's what the new design Orion tom tom holders give you. With a quick turn of a "Pro-Lok" lever, the nylon ball sockets allow an infinite number of tom positions.

## Orion Series Hardware

**C700 Cymbal Stand**  
Extra heavy duty cymbal stand offers maximum stability with large non-skid PVC boots. This three section stand is securely adjusted with MAPEX "Pro-Lok" adjustments.

**B700 Boom Stand**  
This heavy duty boom contender can convert into a versatile extra tall straight stand or disappear for compact transportation.

**H700 Hi-Hat Stand**  
Orion's hi-hat stand combines integral support with solid designs and precise pedal tension adjustment capability to suit the most demanding player's needs. Double spring tension is adjusted with the large gear for quick and easy adjustment from the throne. The foot plate angle can be adjusted to maximize playing comfort.

**S700 Snare Stand**  
Recommended by many of the top Mapex touring and recording artists, this snare stand easily adjusts into the perfect position for each player. A nylon ball socket allows infinite settings and can easily be adjusted by loosening the "Pro-Lok" lever.

**P700 Pedal**  
The Orion foot pedal combines fast, smooth pedal action with greater adjustment capability for specific tension and beater angle. Ball bearings and chain drive will offer years of responsive action.

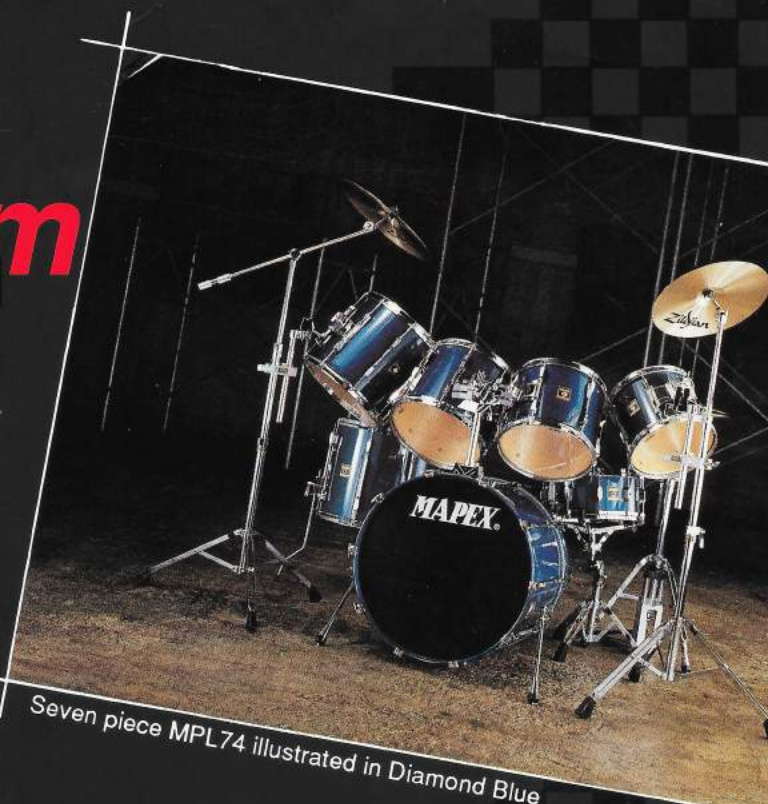

# MAPEX<sup>®</sup> Orion Custom Series

MAPEX Percussion Technology proudly offers its greatest achievement in drum design with the soon to be famous ORION Series.

Numerous integral parts of each Orion Series are totally unique to MAPEX and protected under Patents Pending worldwide. Take a careful look at the fresh design of the patented "Freedom" high tension lugs. Mounted off the surface of each wood shell, these lugs offer full length lugs that actually optimize maximum shell resonance. Check out the "Zero Contact" tom mount system on the Orion Custom series toms. Truly an ingenious way to provide sturdy mounts without losing any of the sound quality.

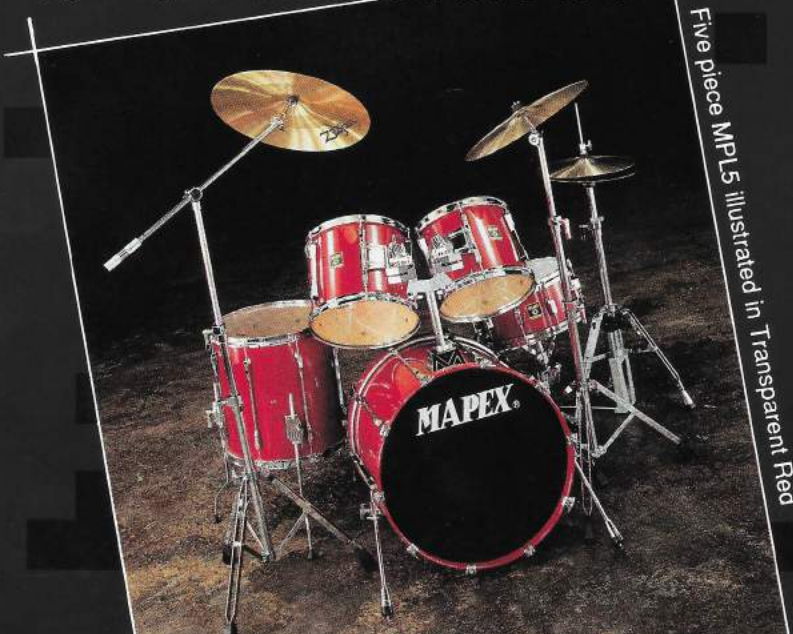

MAPEX Orion Series . . . simply incredible!

All Orion Custom shells including the matching snare drum are 6 ply Canadian maple and 8mm thick. Each ply is cross laminated and diagonally cut at precisely 15 degrees to ensure perfect roundness and enhance strength. Interiors of every shell are carefully hand-sanded twice and then receive two coats of clear lacquer to seal the wood and promote the true sound of Canadian maple. External finish is Mapex's unique eleven step high gloss finish including six coats of lacquer, four hand-sandings, and a final buffing to glass smoothness. Orion bearing edges are precisely machined to a 45 degree angle for increased resonance and volume.

Seven piece MPL 74 illustrated in Diamond Blue

In creating the Orion series, we at MAPEX first thoroughly researched existing full length, high tension lugs. While better tuning availability was always cited, many were concerned over the loss of sound with this type of heavy metal lug mounted directly to the drum shells deadening the sound. Thus was born the idea of the MAPEX "Freedom" lug. "Freedom" lugs are full length, high tension lugs that are mounted 4mm away from the shells to provide maximum resonance. Only two contact points attach "Freedom" lugs to the shell and these are insulated by a poly barrier washer. The result is mounted toms that ring louder and longer with no harsh overtones. Look inside an Orion tom and count the fewest number of screws on any drum made today. Compare this with other brands of drums and you'll see one big reason why Orion series drums sound so good.

Five piece MPL 5 illustrated in Transparent Red

**AVAILABLE COLORS:  
DIAMOND BLUE**

**POLISHED BLACK**

**TRANSPARENT RED**

**NATURAL**

MAPEX has incorporated many design features throughout the line to enhance maximum shell resonance. The Orion patented "Freedom" lugs have only two contact points designed to optimize volume and projection. Whenever metal contact with the wood shell is unavoidable, a poly sound insulator separates all metal attachments from the shell. This concept of minimizing metal contact with wood shells led to the development of the exclusive MAPEX Orion Custom "Zero Contact" tom mounts. Simple but ingenious, the Orion Custom tom mounting system connects to the "Freedom" lugs for absolutely no contact with the drum shell. Thus Orion Custom tom toms provide the greatest resonance possible while being mounted firmly in place.

### "Five Year / Two Year Limited Warranty"

MAPEX drums are warranted for five years to the original purchaser against breakage from normal use or defective material or workmanship. MAPEX shells are warranted against splitting or going out of round. MAPEX hoops are warranted against breakage from normal use.

MAPEX stands, pedals, and holders are warranted for two years to the original purchaser.

This warranty is subject to the limitations contained herein, and is extended to the original retail purchaser only and is not transferable. Proof of your status as original purchaser is required for warranty coverage. This does not cover any products that have been altered, modified, or which have been damaged through misuse, negligence, accidents, or improper operation. Normal wear and tear, sound, heads, plating, drumsticks, brushes, beaters, springs, straps and damages in shipping and transportation are not covered. This warranty is not extended to products purchased from an unauthorized dealer, or products purchased outside of the United States of America. MAPEX makes no other express warranty of any kind whatsoever. MAPEX disclaims liability for any incidental and consequential damages arising out of the use of this product.

All warranty claims will be handled by an Authorized MAPEX Service Center. The defective instruments shall be returned to the MAPEX Service Center with the freight and insurance prepaid, and then only after proper return authorization has been approved. We suggest that any return be handled by an authorized MAPEX dealer. Upon inspection and evaluation, MAPEX alone will determine the extent of liability and will notify the claimant as to the decision. Repaired instruments will be returned to the claimant freight collect.

This warranty gives you specific rights and you may have other rights that vary from state to state.
