

"Appearance, performance and a balanced, focused sound, Saturn Pro has everything 'custom drums' have— except the price."
— Walfredo Reyes, Jr.

In situations that call for a balance of clarity, projection and brightness, top drummers like Wally rely on the Saturn Pro Series from Mapex. That's because Saturn Pro drums not only provide the sound alternative of maple/mahogany shells, they also feature the superior quality, appearance and affordability that is making Mapex the choice of so many of today's leading players.

Saturn drums feature low-mass lugs, a wide choice of lacquer finishes and I.T.S. isolation tom mounts on all tom-toms. Available in popular component sizes and kit configurations with matching wood snare drums and 550 Series hardware. (Shown with Black Panther auxiliary snare drum.)
