DEEP FOREST

The Deep Forest Cherry is a mix of stunning beauty and bright, crisp tone. Each shell is rotary cut from a single log and matched for its color and tone before proceeding further in the manufacturing process. The hardness of the wood creates unequalled projection with optimal sensitivity.

CWS4650
14" X 6.5"

CHERRY

Perfect for live and studio application, the Deep Forest Cherry is destined to be a legend in it's own time. Finished in MAPEX's hand rubbed wax finish, the Deep Forest Cherry drums will redden with age, creating a beautiful and collectable instrument that will look and sound better year after year.

DEEP FOREST

The beauty of the Deep Forest Walnut is only surpassed by its deep rich voice. Like the Cherry Shells, each shell is quality inspected to ensure the consistency of the color and grain. The six ply, 5.1 mm snare drum has a dark, rich, saturating tone that is a studio drummer's dream and a recording engineer's

WTS4650
14" X 6.5"

WALNUT

fantasy. Both the color of the shells and the tonal range of the drums will darken with age. The sound of the Deep Forest Walnut is like nothing you've ever heard and is the first 100% walnut drums in almost a century.

BLACK PANTHER™

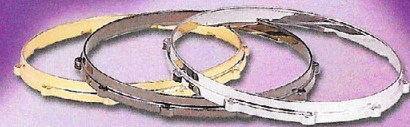

The Black Panther collection includes relatively thin brass, steel and maple shells, featuring ultra-consistent 45° bearing edge. This unique configuration not only allows each shell to achieve maximum sensitivity, clarity and resonance, it amplifies the sonic differences within the different types of materials. Black Panthers incorporate a complete list of professional

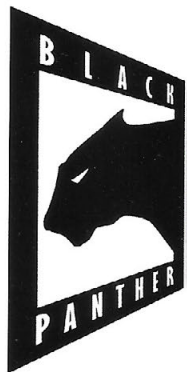

features such as low mass lugs, smooth, easy operating adjustable snare throw-offs,

heavy gauge chrome-steel 2.3mm Powerhoops or 3.0mm Die-cast hoops, nylon tension rod washers and machined-brass lug nuts. All combined to create the most complete collection of individual snare drum voices available for today's versatile drummers.

BLACK PANTHER™

Traditional Maple

The all-maple shell produces a distinctive woody sound that is embraced by drummers, because no matter what thickness you prefer. The maple shell will offer equal tonal bands at any tuning. Available with Transparent Black (TB) and Flat Black (FB) finishes.

ML4550D
14" X 5.5"

10"X 5.5" ML0550FB	10"X 5.5" ML0550TB

14"X 6.5" ML4650FB	14"X 6.5" ML4650TB

Birdseye Maple

Like Traditional Maple Panthers, Birdseye Maple snare drums provide rich, warm sounds and the versatility of being used live or in the studio. Additionally, the Birdseye Maple snare drums offer a hand-selected outer ply which adds visual beauty.

BE4550D
14" X 5.5"

13"X 3.5" BE3550D	14"X 5.5" BE4550D
14"X 3.5" BE4350D	14"X 6.5" BE4650D

Brass

The Brass Black Panther snare drum provides a dark sound at any tuning. High tuning produces distinct overtones, mid-range produces a dry, controlled sound. While low tuning produces a deep 'punch' that can be felt as well as heard.

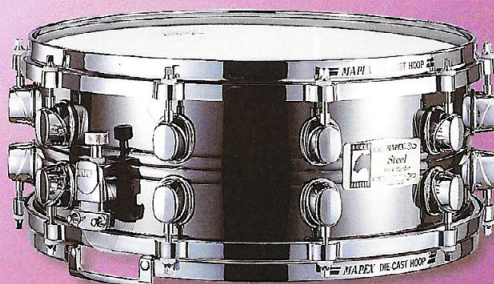

BR4551D
14" X 5.5"

13"X 3.5" BR3351D	14"X 5.5" BR4551D

14"X 3.5" BR4351D	14"X 6.5" BR465H Hammered Shell

Steel

The Steel Black Panther snare drum is our loudest metal shell yet it offers a large dynamic range for soft articulation. The brightness in all of the tonal bands makes the steel Black Panther a very versatile instrument.

ST4551D

13"X 3.5" ST3351D	14"X 5.5" ST4551D
14"X 3.5" ST4351D	14"X 6.5" ST4651D

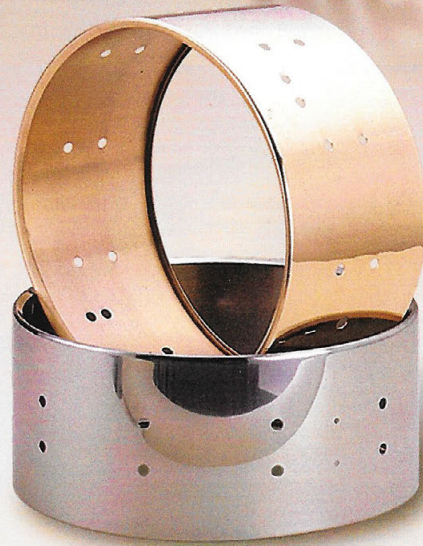

PRECIOUS METAL™

M apex Precious Metal™ snare drums made from costly phosphor bronze, stainless steel and solid bronze materials, offer unique voices of strength and volume to whisper soft subtleties, not available to most until now..

Phosphor Bronze offers the widest range and the most 'well-rounded' sounds. Often described as having the timbre of a hand crafted wood shell, but with the punch of the hardest of metals.

Stainless steel takes the drummer from the whisper of brushes to high pitched, cracking rim shots that would slam the music into shape!

Solid Bronze Precious Metal™ snare, a drum of great intensity, generates a sound density that will power the band in virtually any environment. Yet the very clarity of the phosphor bronze material still defines a very focused, clarified timbre and allows for wide tuning range.

Precious Metal™	Phosphor Bronze	Stainless Steel	Solid Bronze <small>NEW</small>

HAMMERED HAMMERED

Snare Drums Collection

The carefully hammered shell of the MAPEX Hammered™ Black Panther™ and Precious Metal™

snare drums create an unevenly walled acoustic chamber, much like the multi-surfaced walls of fine recording studios. This results in reduced ringing harmonics and standing tones that baffle sound engineers. The specific Brass, Stainless Steel or Phosphor Bronze timbre is more focused, without sacrificing dynamic range or the unique characteristics of each shell's composition.
