BEING A GREAT DRUMMER

Confidence is what makes a good drummer a great drummer — confidence in your ability, confidence in your band, confidence in your instrument. For over fifteen years, Mapex has been creating acoustic drum products that give drummers the confidence to be their best. With a Mapex drum set in front of you, you'll have the confidence to express every degree of your creativity. With Mapex, you'll own the stage.

Whether you're just getting started or you're a seasoned player, Mapex makes a drum set that not only fits your skill level, but fits your budget as well. From the versatile Q Series to the elite Orion Series, Mapex is a drum company that you can start with and grow with for a lifetime.

BUILT FOR CONFIDENCE

Mapex players know that their drums are built with quality and superior performance in mind. All Mapex products are manufactured by its parent company, KHS Musical Instruments. KHS was founded in 1930 and has grown to be one of the largest musical instrument producers in the world today. That remarkable growth is a result of designing, engineering and building the highest quality products without compromise. In fact, KHS is one of the only musical instrument companies to have earned the ISO 9001 certification — the world's standard for manufacturing excellence.

KHS applies the same strict quality guidelines across its entire family of products. Every Mapex drum, regardless of price, is built to rigid Mapex manufacturing specifications. The remarkable consistency and excellence of Mapex products is, in part, the result of an environment committed to its employees and a continuous investment in state-of-the-art manufacturing equipment.

Before buying, examine the inside of the drum as closely as you do the outside. Thinner shells and fewer holes produce greater sonic response.

ONLY THE BEST MATERIALS WILL DO

Mapex understands that in order for you to have confidence in your gear, you have to sound and look your best while performing. This is why Mapex selects only the finest raw materials to build your drums. Premium grade hardwoods like North American Maple, walnut, birch and basswood are hand-selected and sonically matched by skilled acoustical experts to ensure that every drum Mapex produces carries with it the signature Mapex tonal and resonant properties.

The result is a drum that you take on stage or into the studio with complete confidence that your style and creativity will be not only perfectly reproduced, but *enhanced* by your Mapex drum set.

Mapex not only wants you to sound your best, you need to look great too. That's why on all of its painted drums, Mapex finishes each component with an eight-coat, hand-rubbed, high-gloss lacquer. Your Mapex drums will be durable, easy to maintain and will make you the envy of your drumming community.

THE CASE FOR THINNER SHELLS

Mapex uses exceptionally thin, individual plies during construction resulting in a shell that's thinner by comparison to others, yet stronger and exceedingly stable. The plies are arranged in a cross-lamination process with staggered seams, and formed under high pressure and temperatures using state-of-the-art tooling and adhesives. Additionally, Mapex shells are crafted using both internal and externally applied pressure. This advanced capability places Mapex among an elite group of builders. Leading edge construction delivers a drum that's strong enough to carry a lifetime warranty using Mapex's thinner-by-design build philosophy.

Finally, each drum shell is finished off with a precision-ground 45° bearing edge, building a perfect platform for the drumhead. With this minimal point of contact, it's no wonder that Mapex players rave that Mapex drums are the easiest tuned drums on the market and they're often "perfect — right out of the box!"

WHAT ABOUT "REINFORCING RINGS?"

It's no small wonder that some products' requirement of a structural necessity gets morphed into a "design feature." Here's the difference between the applied science of physics & engineering and creative marketing.

Reinforcing rings are a structural component that may be necessary to help prevent the shell from deforming. Secondly, adding structural mass to any acoustic instrument almost certainly adversely affects the sonic potential inherent to the consistent overall thickness of the structure.

Mapex engineers have found that reinforcing rings have a general tendency to influence an instrument's sonic properties into higher fundamental frequencies and inhibit resonance. Based on player feedback, Mapex drums offer a wider effective tuning and playing range. They're easily tunable to high pitch when necessary, but are structurally capable of achieving a lower tonal floor. Try tuning your drums starting with the kick and floor tom. You can always tune up, but getting clean lower frequencies is the challenge. Ever hear anyone comment about how high pitched your floor tom is? Probably not.

When you're evaluating shells, consistent overall thickness has a ready influence on tonal characteristics. While a manufacturer may feature "5-ply construction," those five plies may actually achieve an overall thicker shell than many Mapex shells. Think of it like a premium acoustic guitar top. Premium instruments have the thinnest, strongest tops to produce the fullest range of tone and best sustain. If the assembly is thicker, or requires additional bracing, you'll notice that the tone tends to favor higher frequencies and sustain is equally affected. When it comes to building drums, Mapex thinks you'll agree — thinner and stronger is better.

CHRIS ADLER *Lamb of*

NEVER BUY A DRUM WITHOUT COUNTING THE HOLES IN IT.

Fewer holes means truer tone and resonance. That's why Mapex builds all of its drums using single point contact lugs. Unlike other drums, Mapex drills only one hole in the shell for each lug, protecting the shells' tonal properties. The lugs are low in mass, meaning less direct contact with shell, protecting the overall sonic integrity of the drum.

REAL-WORLD TESTED

Mapex carefully selects its artist roster to cover a wide variety of playing styles and environmental situations. From Jazz artists playing intimate clubs, to the world's finest pop studio drummers, to heavy metal acts that perform in huge arenas, Mapex has an artist that plays the music you play, on a stage similar to yours.

Mapex products are thoroughly tested by our artist roster, ensuring that your gear is durable, flexible and capable of responding to the subtle nuances of a variety of players in a variety of performance situations.

IT'S YOUR TURN

Take the stage with Mapex and enjoy the confidence that so many players have realized. With your Mapex drum set, your talent and style will be faithfully delivered to your audience, whether you're playing to a crowd of twenty or twenty thousand.

Snare Drums	
BMS4550	14 x 5.5
BMS4650	14 x 6.5

Construction: 7-ply [6 maple interior / 1 burl maple exterior]
Shell Thickness: 6.1mm (Toms and Snares) / 7.5mm (Bass Drums)
Engineering Evaluation:
The Orion has plenty of the up-front “POW” that high-end maple is known for. It’s the classic maple presence, and it’s a little on the edgy side. The higher-pitched toms have excellent balance, but it really comes into play on the 14-inch size drums and larger. Our players frequently comment on how these drum sizes sound deeper than other maple drums. We attribute this to an exceptionally thin shell.

* Available via special order only. Some components and colors may also require special order. Please consult your Mapex Retailer for more information.

Orion floor tom legs with I.T.S. are isolated from the shell and include spring loaded feet, that enhance sustain and increase projection.

All maple, lacquer finished bass drum hoops are secured by low-profile, cushioned die cast bass drum claw hooks.

The outer burl maple ply is exquisitely figured, giving each Orion Burl kit its own unique fingerprint.

The bass drum’s non-penetrating double tom holder features multi-directional adjustment for precise set-up. The tom holder mechanism is also completely removable for players that prefer tom stands.

Every Orion component is finished with eight hand-rubbed coats of high gloss lacquer. This unique finishing process gives the drum a beautifully deep, high gloss, protective shine.

Toms and snares are equipped with exclusive Mapex Powerhoops. Made from 2.3mm chrome steel, the Mapex Powerhoop provides flex resistance without adding unnecessary weight that may mute the drum.

The tom’s mount is secured via the lugs and is not drilled directly into the shell. The Mapex I.T.S. System allows the shell to vibrate freely, allowing for maximum projection and resonance.

The Orion’s non-penetrating, I.T.S. telescopic bass drum spurs isolate the shell from additional holes and distribute the weight of the drum across existing lug mounts, eliminating additional holes in the drum.

All Orion drums are equipped with Remo® Weatherking™ Ambassador™ drum heads.

Mapex’s low mass lugs are secured to the shell via only one point of penetration. Fewer holes in the drum shell means less vibratory interruption, resulting in truer tone and unimpeded resonance.

Orion kits include double braced 950-Series Mapex hardware. This top-of-the-line hardware package provides the best in flexibility and performance.

Construction: 6-ply [4 maple exterior / 2 walnut interior]
Shell Thickness: 5.1mm (Toms and Snares) / 7.2mm (Bass Drums)

Engineering Evaluation:
The Saturn has the widest tuning range of any drum you'll ever play. The shells withstand significant head tension, so they easily tune into the bright maple register. What makes the Saturn shell unique is that with less head tension, the walnut interior plies achieve a lower fundamental tone than any other drum available.

The bass drum's non-penetrating double tom holder features multi-directional adjustment for precise set-up. The tom holder mechanism is also completely removable for players that prefer tom stands.

Every Saturn component is finished with eight hand-rubbed coats of high gloss lacquer. This unique finishing process gives the drum a beautifully deep, high gloss protective shine.

Toms and snares are equipped with exclusive Mapex Powerhoops. Made from 2.3mm chrome steel, the Mapex Powerhoop provides flex resistance without adding unnecessary weight that may mute the drum.

The tom mount is secured via the lugs and is not drilled directly into the shell. The Mapex I.T.S. System allows the shell to vibrate freely, allowing for maximum projection and resonance.

Construction: 7-ply [all maple]
Shell Thickness: 5.8mm (Toms and Snares) / 7.5mm (Bass Drums)

Engineering Evaluation:
A little known fact about the Pro M is that its shells are manufactured to the same specifications as our top-of-the-line Orion shells. Extra thin, all maple shells that are bright and crisp with all the attack you'd expect from a high-end maple shell.

BUY the KIT GET the CAT

Buy a 2006 Pro M and get this exclusive Black Panther Snare Drum FREE!

This Black Panther Maple and Cherry 12 x 7 Snare is only available when you purchase a new Pro M kit* from your authorized Mapex Retailer.

Offer valid only on the purchase the following models: PM6225A, PM5466A, PM5255A, PM5225A, PM5245A, PM5045A, PM4815A.
Offer expires December 31, 2006.

The tom's mount is secured via the lugs and is not drilled directly into the shell. The Mapex I.T.S. System allows the shell to vibrate freely, allowing for maximum projection and resonance.

** Classic configuration only available in Platinum Sparkle (SS) and Bermuda Sparkle (OS).

The bass drum's non-penetrating I.T.S. double tom holder isolates the bass drum shell from any vibration from the tom toms.

Whether you choose a genuine Delmar® wrap finish or an eight-coat transparent or sparkle lacquer finish, your Pro M will look great for years to come.

Pro M sets are equipped heavy duty double braced hardware.

Toms and snares are equipped with exclusive Mapex Powerhoops. Made from 2.3mm chrome steel, the Mapex Powerhoop provides flex resistance without adding unnecessary weight that may mute the drum.

All Pro M drums are equipped with Remo® drum heads.

Mapex's low mass lugs are secured to the shell via only one point of penetration. Fewer holes in the drum shell means less vibratory interruption, resulting in truer tone and unimpeded resonance.

Unparalleled performance.

If you've been looking for a reason to get a great set of birch drums, look no further. The M Birch Series from Mapex is the kit for you. Thin birch shells, with a handsome, gloss-lacquered exterior maple veneer provide beauty and performance,

Mapex has extended its "6 for 5" special throughout 2006 and added a "7 for 6" offer, which means no matter which configuration you choose, you'll get more quality, more value — and more drums — for your money.

Construction: 6-ply [5 birch, maple exterior]

Shell Thickness: 7.2mm

Engineering Evaluation:

Since it's less dense than maple, birch tends to influence sound by balancing out some of the high-end attack that's most commonly associated with maple. The toms have great tuning range, and the kicks sound very large. Maple has a more attractive grain pattern than birch, so our birch drums feature a thin exterior ply of maple for cosmetic purposes.

The best deal in Birch Drums keeps getting better.

When Mapex introduced the M Birch Series, and its “6 for 5” special, it instantly became a best-seller. This year, the deal has been sweetened. In 2006, when you purchase *any* five or six-piece M Birch drum set, we'll give you an extra tom, *absolutely free*.

That's right. Buy a six-piece kit, get a seventh tom tom free. Buy a five-piece drum set, and we'll make it a six-piece set (complete with mounting hardware) at no extra charge.

M Birch from Mapex — still the sweetest deal in drums.

All M Birch Kits include a matching birch shell snare drum.

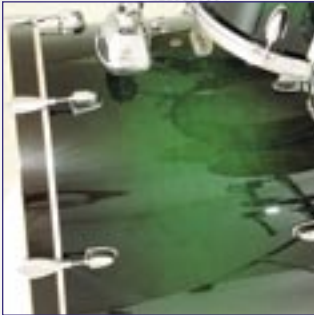

All M Birch drums are equipped with Remo® drum heads.

The all maple M Birch bass drum hoops are color matched and secured via low profile claw hooks.

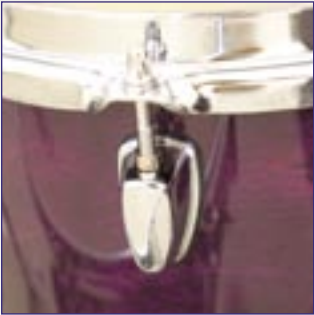

The tom's mount is secured via the lugs and is not drilled directly into the shell. The Mapex I.T.S. System allows the shell to vibrate freely, allowing for maximum projection and resonance.

The M Birch's exterior maple ply allows beautiful wood grain to show through the drum's eight coat, hand rubbed, lacquer finish.

M Birch kits come complete with Mapex 550 Series double-braced hardware.

Mapex's low mass lugs are secured to the shell via only one point of penetration. Fewer holes in the drum shell means less vibratory interruption, resulting in truer tone and unimpeded resonance.

Construction: 8-ply [8 basswood, maple exterior]

Shell Thickness: 7.2mm

Engineering Evaluation:

Basswood is an excellent hardwood for instrument making. Its sonic properties are very similar to maple, yet it possesses a little warmer tone that's similar to birch. This year, we've added a beautiful exterior maple veneer to the shell to allow the transparent lacquer to accentuate the wood grain.

The VX Series' satin finishes are applied over a beautifully grained maple veneer.

A padded drummer's throne is included with every VX Series drum set.

VX Series Kits include double braced hardware with memory locks.

New for 2006! VX Series toms include the Mapex off-the-shell ITS system.

Mapex's low mass lugs are secured to the shell via only one point of penetration. Fewer holes in the drum shell means less vibratory interruption, resulting in truer tone and unimpeded resonance.

VX Series drum sets include a matching maple and basswood shell snare drum.

All VX drums are equipped with Remo® drum heads.

Maple bass drum hoops are color matched and secured via low profile claw hooks.

Construction: 9-ply [basswood]

Shell Thickness: 7.2mm

Engineering Evaluation:

With the exception of the exterior cosmetic maple ply, this drum shell is exactly the same as the VX Shell. The basswood responds with plenty of attack and is exceptionally full-bodied. With off-the-shell I.T.S. mounts and single-point-of-contact lugs, this is an incredibly sophisticated and high performance drum set for the price.

qr series

Matching wood bass drum hoops are secured with low-profile claw hooks.

The off-the-shell I.T.S. mounting system ensures maximum shell vibration.

QR Series drums come equipped with Remo® heads.

Single-point-contact lugs mean fewer holes drilled into the drum shells for maximum resonance.

BLACK PANTHER SNARE DRUMS
HANDCRAFTED FOR GREAT HANDS

If you're only playing one snare sound, you're cheating yourself. Black Panther Snare Drums come in a huge variety of sizes and shell materials, giving you plenty of opportunity to expand your sonic range.

Whether you add a steel, brass, bronze or premium wood Black Panther snare, you can count on maximum sensitivity, clarity and resonance. Black Panther Snares are built for the professional player to exacting specifications and feature low-mass lugs, easy-to-operate throw-offs, nylon tension rod washers and precision machined brass lug nuts.

BPPB4651	14 x 6.5	1mm Phosphor Bronze	Polished Bronze	2.3mm Power-hoop	Black Chrome

PREMIUM BRASS

The deep, dark, rich tone of the Black Panther Brass Series produces distinct and crisp overtones at a high tuning while maintaining a dry and controlled response at the mid-range. At a low tuning, the Black Panther Brass Snare delivers the deep and driving punch that you feel as clearly as you hear.

Model	Size	Shell Type	Finish	Hoops	Hoop/Lug Finish
BPBR0551	10 x 5.5	1.2mm Brass	Black Chrome	2.3mm Power-hoop	Black Chrome

2006 MAPEX HARDWARE

BASS DRUM PEDALS

Your pedal not only gives a real beating — it takes one, too. Studies show it’s the most frequently replaced hardware component. So when it’s time to get a new one, get one you can rely on. Mapex pedals are made of solid steel components and are engineered to be reliable, durable and most importantly — playable. Adjustments are made quickly and easily, keeping you going during gigs — night after night.

Tri-Tonal Beater
The rotating beater gives you a choice between maple, felt or ABS for precise impact tone.

Patented Floating Hoop Clamp
Allows fast, secure and non-damaging fastening to the bass drum.

Complete Security
With retractable floor spikes and a non-slip rubber sole, the pedal stays in place, regardless of the surface you’re playing on.

Dual Universal Non-Slip Linkage
The P980A and P580A’s linkage is adjustable on both pedals. U-joints are sealed in rubber to prevent build-up of dirt and grime.

HI-HAT STANDS

With features that rival the most costly models, Mapex hi-hat stands are built to give you superior control and maximum flexibility. Durable chrome steel tubing provides a strong and attractive framework

Tri-Nodal Cymbal Seat
Adjust your bottom cymbal to almost any angle with minimal cymbal contact.

10-Stop Tension Adjustment
Incremental, positive tension can be adjusted to your individual style and preference.

Rotating Leg Assembly
Rotate the legs of the stand a full 360° for close positioning in tight set-ups.

True-Direct Pull Drive System
This patented design maintains vertical pull motion for improved response and control.

SNARE STANDS

Secure your most frequently used drum in a stand that’s strong, durable and flexible. Mapex snare stands are designed to allow you precise positioning and stable balance of your snare drums, while allowing the drum to resonate freely.

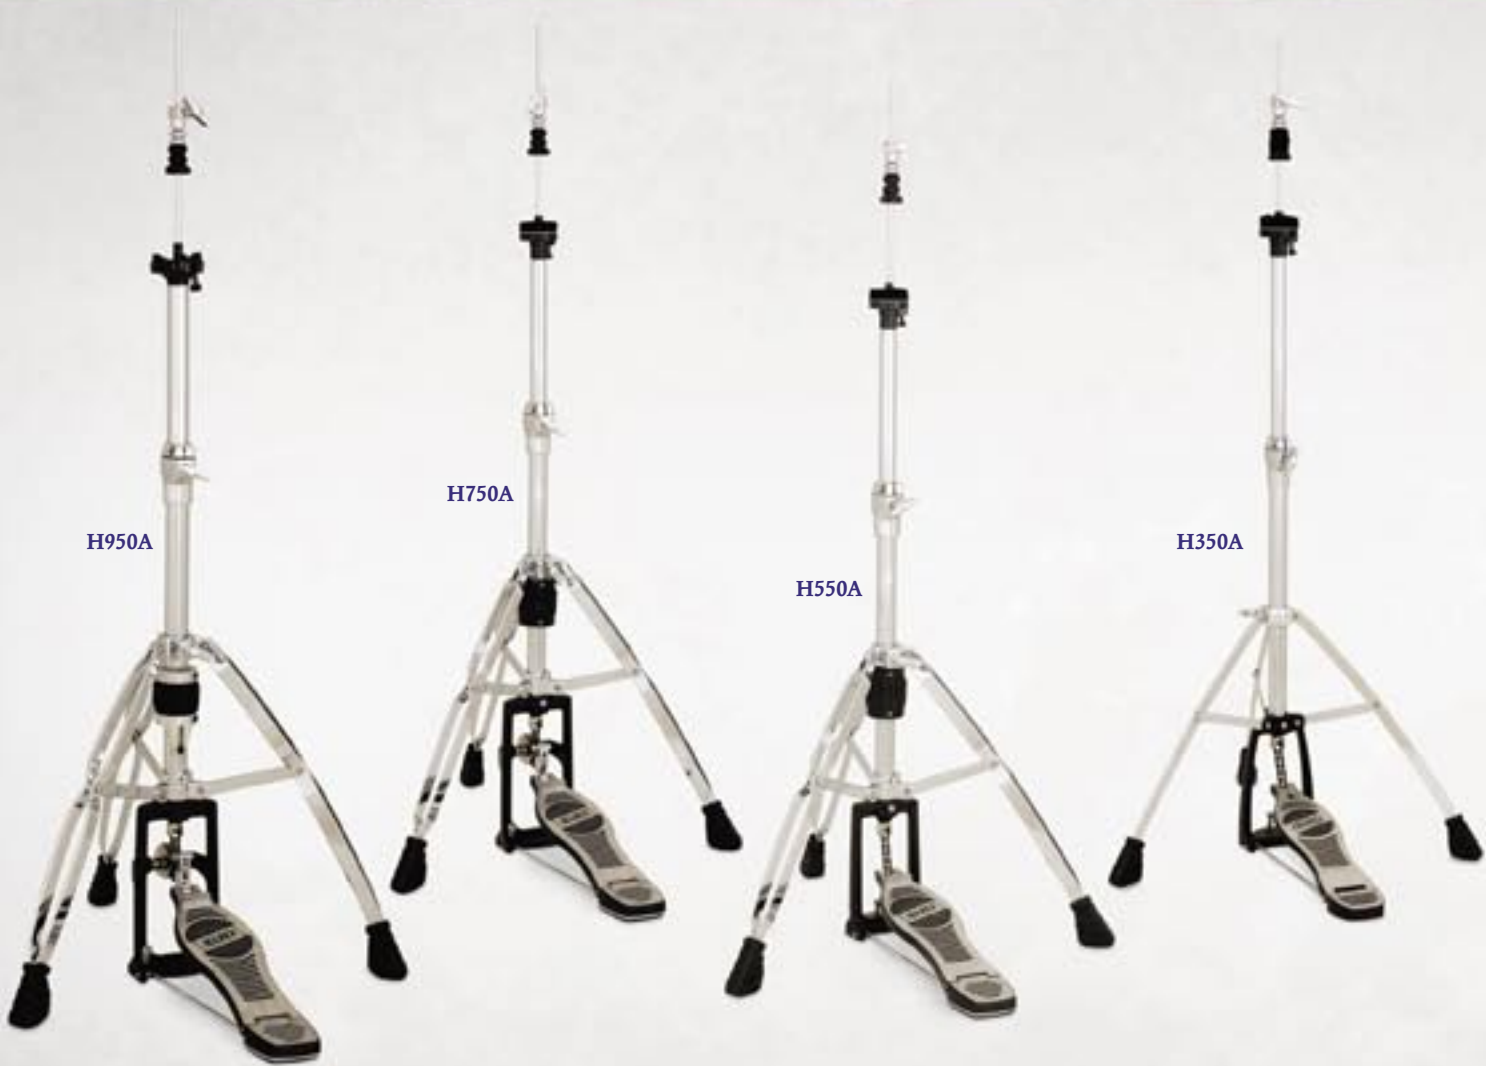

Universal Ball-in-Socket Tilter
Allows fast, secure and non-damaging fastening to the bass drum.

Ground-Reach Shaft Design
The S950A's center shaft reaches the ground for extra-low positioning and a high-threaded basket for small snares.

Slip-Proof Nylon Inner Sleeve
Nylon inner sleeves are built into the chrome shaft for extra security and reduced rattle in the studio.

It’s all there for you, 24 hours a day.

The Mapex Warranty

It's one of the best warranties in the business. A lifetime warranty on drum shells, one year on finishes and hoops and five years on hardware. All of Mapex products are built in its ISO-9001 certified factory, which means you can count on superior quality — right out of the box.

MAPEX drums, hardware, stands and accessories, except as noted, purchased from an authorized MAPEX dealer, are warranted to the original retail purchaser against defective material and workmanship. Warranty coverage is not transferable and shall be valid by item and subject to terms and conditions indicated below. The original retail purchaser must include a copy of their original sales receipt or provide proof of sale by an authorized MAPEX dealer to activate warranty service without charge.

Warranty Coverage and Time Period

Shells

Drum shells are covered under a limited lifetime warranty to the original retail purchaser against splitting, ply separation, material failure and going out of round as a result of manufacturing. Defects caused as a result of wear, handling, negligence, temperature, humidity, corrosive atmosphere or other external causes are not covered under this limited lifetime warranty.

Finish & Hoops

Both lacquered finish and hoops and all wrapped finishes are warranted to the original retail purchaser against defective material and workmanship for one (1) year from date of purchase. Defects caused as a result of wear, handling, negligence, temperature, humidity, corrosive atmosphere or other external causes are not covered.

Stands, Pedals & Hardware

MAPEX stands, pedals and hardware are covered under a limited five (5) year warranty to the original purchaser against defective material and workmanship. Defects caused as a result of normal wear, handling, negligence, temperature, humidity, corrosive atmosphere or other external causes are not covered under this limited five (5) year warranty.

The following items are not covered under the MAPEX Warranty; heads, plating, pedal beaters, springs, snares, straps, normal wear and tear, sound or damage from shipping and transportation. The MAPEX Warranty is rendered void on all items that have been altered, modified or subjected to improper operation, misuse, neglect or exposure to extreme conditions.

Owner's Responsibility

To Obtain Warranty Service

A Warranty return should be handled by any authorized MAPEX dealer from which the instruments were purchased. All repairs under terms of this Warranty must be handled by Mapex USA. Any instrument to be returned under this Warranty requires a Return Authorization Number shown on the outside of the carton and must be shipped prepaid. Mapex USA will then inspect and evaluate the extent of warranty coverage and notify dealer of claimant. Mapex USA will repair or replace, at its option, any instrument or part thereof, found to be defective and covered under terms of the MAPEX Warranty. Repaired instruments will be returned freight collect.

Warranty Limitations

This Limited Warranty is made in lieu of all other warranties, either written or implied and is subject to the limitations contained herein. It is extended to the original retail purchaser only and not transferable. Proof of purchase is required. Under terms of this warranty, Mapex USA accepts no responsibility for incidental or consequential damages of any nature associated with the use of MAPEX products. This warranty gives you specific legal rights and you may have other rights which vary from state to state and could affect this warranty.
