THE STORY

Working closely with our

drum design team, a panel of

international Mapex Artists

shared their advice and

expertise on everything from

shell materials and functionality,

to sizes and aesthetics.

The result is a collection of

unique Black Panther Snare

Drums that look fantastic and

sound even better. Each drum

features hand-built and hand-

finished Black Panther shells

and pro-level hardware.

FEATURES

Sonic Saver Hoops

The unique shape of the Sonic Saver Hoop reduces wear and tear to sticks, makes the drum easier to tune, enhances the sound of rimshots, and won't choke the shell's vibration. All resulting in much greater resonance.

Cylinder-Drive Strainer

The cylinder-drive strainer and butt-end adjuster uses a self-lubricating bearing to ensure smooth operation. The adjustment dial employs "micro-lock" technology that provides precise control.

Premium Snare Wires

All Black Panther Snare Drums feature stainless steel snare wires for crisp, lively action.

WE KNOW. JUST BREATHE.
